

**START HERE / FREE STARTER**

# A place for every part.

Find your consumables. Count what matters. Reorder before the bin is empty.

## **01 Sort by process, then verify the part.**

Use MIG, TIG, PLASMA and ABRASIVES as storage categories.

Copy the exact part number and description from packaging or your supplier.

Keep similar-looking parts separate. This kit does not establish equipment fitment.

## **02 Give each bin a stable ID.**

Use a prefix plus a number: M01, T01, P01 or A01. Choose your own scheme if you prefer. Match each label to the map, stock sheet and reorder sheet.

Use one map per cabinet or category. Keep IDs when stock levels change.

## **03 Choose the unit, then set a reorder point.**

Count in one consistent unit: pieces, packs, spools or another stated unit.

Base your reorder point on actual use, supplier lead time and a safety buffer.

When quantity on hand reaches or falls below that point, review an order.

## **04 Make it a small routine.**

Count on a regular schedule and after big jobs. Date each count.

Check open orders before buying again. Enter an order quantity yourself;

the PDF does not calculate quantities, sync inventory or place orders.

## **YOUR FREE STARTER**

Next: six cut-out bin labels, a six-bin map and a six-line stock-count sheet.

Print on plain Letter paper. Cut labels out and place in bin holders or tape to bins.

For 30-up label sheets, process-specific sets and reorder tools, use the full kit.

**LABEL / CUT-OUT PLAIN-PAPER STARTER**

# Six bins. One clean start.

Fill these fields or write by hand. Print at 100% on Letter paper, then cut on outlines.

This starter is not an adhesive-sheet template. Use bin holders or tape.

## KEEP THE LABEL MEANINGFUL

PART #: copy the exact manufacturer or supplier part number.

DESC / SIZE: add the item description, relevant size and counting unit.

QTY: quantity on hand. REORDER AT: your chosen review threshold.

BIN: your location ID. Categories you can use: MIG, TIG, PLASMA, ABRASIVES.

The starter does not provide verified part numbers or equipment compatibility.

TRACK / SIX-BIN STARTER

# Map it. Count it.
